JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

*Influenza (la grippe).—Continued.*

*Chicago, Ill.*—During the week ended February 4, 1899, 59 certificates of death were returned to the office of the commissioner of health, giving influenza or la grippe and its complications as the cause, viz, 6 to uncomplicated influenza, 26 to influenza as the cause, complicated with some other affection, chiefly pneumonia, and 27 to other affections, chiefly pneumonia, with influenza as a contributing cause.

During the week ended February 11, 1899, 55 certificates of death were returned to the office of the commissioner of health giving influenza or la grippe as the cause, viz, 18 to uncomplicated influenza, 23 to influenza, complicated with some other affection, chiefly pneumonia, and 14 to other affections with influenza as a contributing cause.

*Mobile, Ala.*—No cases of la grippe or influenza have been reported to the city board of health during the last two weeks. Two deaths have been reported from other diseases complicated with la grippe.

*San Francisco, Cal.*—The number of deaths reported to the health office of San Francisco for January, 1899, was 753, the largest in its history. Of these deaths, 41 are directly attributable to influenza.
